

KARTIK KASAUDHAN

Gonda, Uttar Pradesh — +91 8810900579 — kartikgupta3105@gmail.com — LinkedIn

SUMMARY

Motivated MCA student with a strong foundation in Java, Data Structures & Algorithms, and backend development using Spring Boot. Familiar with building RESTful APIs, implementing authentication and authorization, and working with databases such as MongoDB, MySQL, and Redis. Comfortable with core concepts like OOP, DBMS, and operating systems, along with tools such as Git, Docker, Maven, and Postman. Seeking an entry-level software engineering role where I can apply my backend development and problem-solving skills to build scalable, efficient, and reliable applications.

EDUCATION

Master of Computer Applications (MCA) — Vellore Institute of Technology **2025–2027**
CGPA: 8.33

Bachelor of Computer Applications (BCA) — Jhunjhunwala P.G. College, Ayodhya **2021–2024**
Percentage: 75.11%

SKILLS

Programming Languages: Java, Python

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, System Design Basics

Backend Development: Spring Boot, Spring Security, Hibernate, REST API Development

Databases & Caching: MongoDB, MySQL, Redis

Tools: Maven, Git, Docker, Postman, JUnit, Mockito

PROJECTS

Journal Entry Management System | Java, Spring Boot, MongoDB

- Developed a secure journal management application enabling users to create, read, update, and delete journal entries through RESTful APIs.
- Implemented authentication and authorization to ensure secure access to journal data and improve application reliability and privacy.
- Integrated MongoDB for efficient storage and retrieval of user-specific journal entries, enabling smooth backend data management.

Car Sales Analytics and AI Recommendation System | Java, Spring Boot, MongoDB, Python

- Built a production-style Car Sales Analytics and AI Recommendation System using Java, Spring Boot, MongoDB, Spring Security, JWT, and Python, enabling secure management of inventory, sales, and customer-centric recommendations.
- Implemented role-based access control (ADMIN/USER), JWT authentication, and global exception handling, while exposing documented REST APIs through OpenAPI.
- Designed analytics endpoints using MongoDB aggregation pipelines to generate revenue insights, top-selling brand reports, monthly sales trends, and fuel-type performance metrics.
- Integrated a Python Flask AI microservice to recommend cars based on budget, fuel type, seating capacity, and body type, and containerized the system with Docker for easier deployment.

CERTIFICATIONS

Git & GitHub Bootcamp — LetsUpgrade

Certificate No: **LUEGGFEB126280**

SOFT SKILLS

Problem-Solving — Communication — Teamwork — Adaptability — Leadership — Quick Learner
